Adjustable Starwheel (Case Flipper) Rotates 180 Degrees without Damage

The unit is also capable of passing cases without rotation when required.

This recently built single lane case flipper, more commonly known as a "starwheel", was built specifically for a food application where the product needed to be reoriented for processing and settling purposes. The equipment will rotate filled cases 180 degrees in the direction of travel after entering the donut shaped device and gently place it back on its journey down the line without harming the case or product inside. ... Problems solved first time for this consumer goods company

Success on multi-line conveyor installation that saved money with simplistic integration.

Finding the right conveyor manufacturer may sound like an easy task, however locating one that brings engineering, design and controls integration, with reliably-built equipment while keeping the price very competitive is the key to success. According to Nicolas Patois, **Patois Associates**, "When our pharmaceutical consumer goods customer was relocating six production lines to another plant, ... [\(read rest of the story ..\)](#)

"Conveyors. Components. Complete Control."

Why do customers keep coming back to Multi-Conveyor? Because that's all we do. **Quality conveyors.**

Whether it's a custom project or a standard conveyor, we can provide the most reliable, steady and timely-built systems at your request - using your specifications and our skilled engineering expertise and know-how.

Take the Multi-Conveyor challenge. Even if you're satisfied with your current supplier, let us quote your next system. Compare the difference. You may be quite surprised. Call us today.

Then, be sure to visit www.multi-conveyor.com for complete conveying solutions.

Vibration assists in product settling

Vibrating conveyors are used to settle or shift product inside of cartons or containers in a very subtle fashion without interrupting the content itself. In some food cases, the vibrating will help settle or even slightly mix ingredients or food to assist in even weight distribution prior to final case packaging. [Watch this video showing a simplistic, gentle yet effective vibrating system.](#)

UL Listed Controls

Our [full service electrical department](#) starts with design and system layouts. On-site electrical panel installation and start up services are based on more than 20 years of material handling experience. Backed by servo drive technology, our projects achieve their targeted aims for your process. Our controls department is UL certified for panel building and PLC programming. We can rotate, push, pull, clamp, slide, flip, spin or deliver just about any control solution. [Learn more.](#)
