MATERIAL HANDLING EQUIPMENT

- Established in 1989 with over 2000 Conveyor Systems completed.
- We are a full service company skilled in all phases of Material Handling Design and Construction.
- We are your active partner from concept, to installation and commissioning.
- Full staff of Mechanical Engineers, Designers and Technicians to assist your company with ideas and solutions that are proven through many years of experience.
- Our conveyors and equipment prove their value by working reliably 24/365. With on-time delivery critical to getting your special product to market on time to create the edge needed to capture market share.
- Our equipment is sturdy and built to last.
- All work is performed 100% in our facility.
- We set-up and test your equipment in our shop with or without your companies participation.
- Our in-house automation department has the capability to design and install state of the art controls.
- Our control department is UL certified for panel building and PLC programming.
- Experienced Project Managers assigned to each material handling project.
- Our 45,000 square foot shop is new and equipped with 6 overhead cranes.
- Our fabricating machines are all computer controlled to insure quality.
