

Testimonial:

Problem solved first time for this consumer goods company.

Success on multiple line conveyor installation that saved money with simplistic integration.

Finding the right conveyor manufacturer may sound like an easy task, however locating one that brings engineering, design and controls integration, with reliably-built equipment while keeping the price very competitive is the key to success.

According to Nicolas Patois, Patois Associates, "When our pharmaceutical consumer goods customer was relocating six production lines to another plant, they awarded the million dollar conveyor project to Multi-Conveyor for their cost saving design ideas, controls integration, and overall competitive bid. "

"They also use 11 gauge steel, thicker than most competitors, which demonstrates their commitment to quality."

This is a very common response from companies who have chosen Multi-Conveyor. Integrators, engineers, OEM's, contract packagers and manufacturing plant teams use the experienced engineering and design staff at Multi-Conveyor which actually saves them money when installing new lines or upgrading existing processes. In many cases, Multi-Conveyor's concepts and pricing are problem-solvers the first time, without multiple quotes or redesigns.

"I've been in the conveyor manufacturing industry for over 20 years and have had the opportunity to assist with solutions for companies in nearly every facet of the packaging industry", says **Stuart Tribbey, Project Manager, Multi-Conveyor**. "We work intimately with each project, from concept to installation, including customer FAT's (Factory Acceptance Tests) right on our shop floor. In many cases, we can make last minute changes at our customer's request which is uncommon for most conveyor companies."

"Conveyors. Components. Complete Control."

Standard, Cost-Effective, Easy, Quick-Ship Conveyors

Accumulators, Alpines, Rotaries

Single Filers, Inclines/Declines, Spirals

All controls are UL listed.

Upenders, Product Turners and much more.

11 Ga. Mild and Stainless Steel frames are standard - 7 Ga. also available.

Why do customers keep coming back to Multi-Conveyor? Because that's all we do. **Quality conveyors.**

Whether it's a custom project or a standard conveyor, we can provide the most reliable, sturdy and timely-built systems at your request - using your specifications and our skilled engineering expertise and know-how.

Take the Multi-Conveyor challenge. Even if you're satisfied with your current supplier, let us quote your next system. **Compare the difference.** You may be quite surprised. **Call us today.**

Then, be sure to visit www.multi-conveyor.com for complete conveying solutions.

Patois continues, "Multi-Conveyor's custom designs and options meet the many new sanitary requirements challenging our customers in the food industry. They also use 11 gauge steel, thicker than most competitors, which demonstrates their commitment to quality." Tribbey further explains, "Our machines are all built right here, shipped directly from our floor to your door, with over 75% of our facility dedicated to the fabrication and assembly of our systems."

Multi-Conveyor is not new to the industry. They have been around since 1989 and are nearing their 25 year anniversary. This means you're working with one of the industry's best - with the experience and know-how to take on products in Automotive, Beverage/Bottling, Bakery, Dairy/Food (Sanitary), Household Products, Personal Care, Pharma/Nutraceuticals, Industrial and beyond.
